

Tytuł: That's The Way I Feel About You

There are roads that can take you to places you've never been
There are people - when you meet them
It's like they have lived inside your skin
There are souls you connect with so strong
A bond that's so deep and so true
And that's the way I feel about you

There are times like a magnet you're drawn into somebody's life
You don't know what you're doing or why you are there
But you know it's right
There is a sense that the piece that was missing
Has suddenly come into view
That's the way I feel about you
That's the way I feel about you

I believe in this world there is nothing that happens by chance, no
There's a reason that at just the particular moment you came into my hands
Like a gift that you never expected
But you'll treasure your whole life through
That's the way I feel about you
That's the way I feel about you

Like a gift that you never expected
But you'll treasure your whole life through
That's the way I feel about, that's the way I feel about you
That's the way I feel about you
